Dear Parents,

To help our Year 1 children become confident mathematicians we have subscribed to an educational maths website that children can access from home on computers, smart phones or tablets. We will be choosing appropriate maths games for your child and will put on new games that link to the math's objective we have been covering in class.

The games have spoken instructions and children progress through the levels with 'rewards' for completing games successfully. We will be able to access the scores for your child, thereby ensuring the games are pitched at the right level. However, if you feel the games are too easy or too difficult for your child, then please let us know.

We will put on a selection of new games at the beginning of each half term. Please access them with your child over the half term. If your child finds a game too tricky leave it and try again later on in the term. Please let us know if your child does not have access to a computer or tablet at home and we will find time for them to access the games at school.

Attached are details of the website address, instructions for logging-on and your child's username and password (and the school code). Please let us know if you have any problems accessing the games.

Thank you

Yours faithfully

Miss. Dean and Mrs. Harmer
